AJAY VIKRAM V

+91 74189 81302 | ajayvikram2512@gmail.com | Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Applied Data Science postgraduate with a strong foundation in Python, SQL, machine learning, deep learning, and data visualization. Experienced in developing AI-driven solutions through academic projects and internships, with a focus on delivering scalable, data-driven applications and business insights.

PROJECTS

AI-Powered Gmail Automation Agent *May 2026 – Jun 2026*

Gmail Automation, AI Workflows, Knowledge Base

- Built an AI-powered email automation agent with a configured knowledge base and conditional workflows to read, understand, and respond to emails based on intent and content.
- Automated end-to-end email processing, reducing manual effort and improving operational efficiency.

Brain Tumor Detection & Explainable AI *Feb 2026 – Mar 2026*

CNN, EfficientNet, Grad-CAM

- Built a multi-class brain tumor classifier from MRI images using EfficientNetB0 transfer learning, achieving ~88% accuracy and 0.97 AUC.
- Applied Grad-CAM to visualize tumor regions and improve model interpretability.

Offline RAG Chatbot *Aug 2025 – Sep 2025*

LLMs, Vector Databases

- Developed a fully offline RAG chatbot with document ingestion, chunking, retrieval, and response pipeline, optimized using quantized GGUF models.

Crop Suggestion Using API Integration *Sep 2024 – Dec 2024*

Python, Machine Learning, Gemini API

- Built a Decision Tree classifier for soil quality prediction and integrated the Gemini API for climate-based crop recommendations via a CLI tool.

TN DMART Sample Data Analysis *Jul 2024 – Aug 2024*

Excel

- Analyzed retail sales data and built interactive dashboards
- Identified top-performing cities, payment modes, and product categories
- Provided actionable insights for retail decision-making

TECHNICAL SKILLS

- **Languages:** Python, SQL
- **Libraries:** Pandas, NumPy, Matplotlib, Seaborn
- **Tools:** GitHub, VS Code, Power BI, Excel
- **Machine Learning:** Classification, Data Preprocessing, Model Training
- **Other Technologies:** Deep Learning, Explainable AI, RAG, Data Visualization

INTERNSHIPS

Data Analyst Intern – Vektor Labs | Aug 2026 – Oct 2026

- Analyzed real-world datasets to identify business trends, uncover performance gaps, and provide data-driven insights to support business decision-making.

Data Analytics Job Simulation – Deloitte | Apr 2026

- Contributed to a simulated data analytics project by analyzing data and creating visualizations

Data Science Intern – Intrainz Edutech | Nov 2023 – Jan 2024

- Assisted in data preprocessing, analysis, and machine learning model development.

EDUCATION

M.Sc. Applied Data Science | SRM University | Chennai, India | Jul 2025 – May 2027 | CGPA: 9.5

B.Sc. Data Science and Analytics | Jain University | Bangalore, India | Aug 2022 – May 2025 | CGPA: 6.65

CERTIFICATIONS

- Foundations of Data Analytics – Google
- Developing AI Applications with Python and Flask – IBM
- Data Analysis and Visualization with Power BI – Microsoft
- AI For Everyone – DeepLearning.AI
